

NextNav "Z" Evaluation App (NNZE)

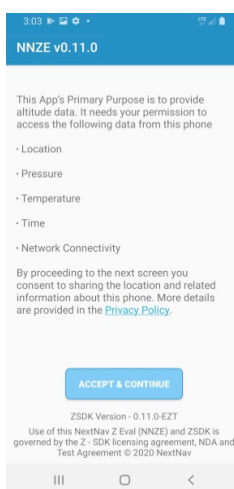

NextNav's NNZE app (available in Android and iOS platforms) is a sample app that integrates the ZSDK into host applications.

The NNZE app gets altitude data from ZSDK and displays it in either graph view or data collect mode. The NNZE app also supports local logging for test and analysis purposes.

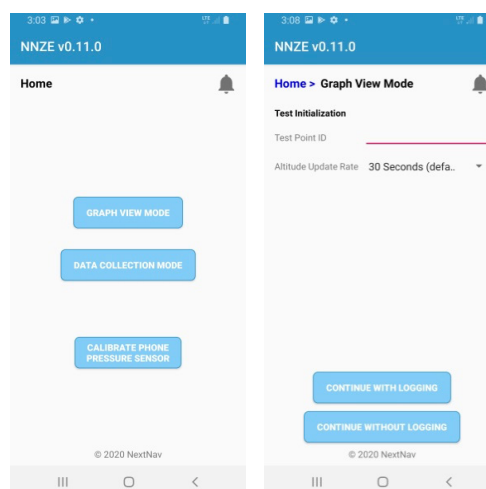

System requirements

- Android Platform Support = OS Versions 8, 9, 10
- iOS Platform Support = OS Versions 11, 12, & 13
- Required data sources:
 - 2D location Data
 - Pressure Data
 - Storage
 - Network Access
